

# Model: RLG66

## Installation Instructions

### ASSEMBLY:

- Step 1.** Using a clean surface area, place all hardware components in a stationary position, much like the diagram.
- Step 2.** Connect frame and steel tubing together by aligning manufactured holes on both frame and tube.
- Step 3.** With the frame and tube connected, insert 1/4 bolt into manufactured bolt holes.
- Step 4.** Tighten down the bolt and continue process until all steel tubes are connected to both frames.
- Step 5.** With the rack assembled place product on its side, and lodge a swivel insert plug into each leg of the frame.
- Step 6.** Once the caster socket is inserted into each leg, a 2" swivel caster will need to be inserted into each caster plug. Align plug hole and caster shaft and press together.
- Step 7.** With the casters installed flip ball rack upright and make sure all components securely connected.
- Step 8.** Complete

PART NUMBER	HARDWARE	QTY
1	Frame	2 pcs.
2	1" Steel Tubing	6 pcs.
3	1/4" Bolt	12 pcs.
4	Caster Socket	4 pcs.
5	2" Swivel Caster	4 pcs.
